

Know that your
remote employees
are working

The COVID-19 outbreak has forced many companies requiring their employees work remotely.

How can you make sure employees are working to sustain your business during this time of economic uncertainty?

How does it work?

CloudDesk app creates a trusted remote working environment where employees can confirm that they are part of a focused and integrated team regardless of their physical separation.

1

Remote employees check-in from their PC to start the work day

2

Sends periodic pop-ups to confirm employee engagement

3

Captures employee photos during check-ins

4

Sync attendance data to Kronos and ADP

5

Managers access real-time usage data and analytics

Make sure you are not paying for unproductive work hours. Monitor remote employee engagement and protect your bottom line with CloudDesk.

CloudDesk starts at only \$10/user/month!

This subscription includes access to additional business productivity apps offered through our CloudApper platform.
