M2SYS

GLOBAL BIOMETRIC TECHNOLOGY LEADERSHIP

1st
To Invent A Platform Including Several Modes Of Biometric Technology

#1
Leader For Cloud-Based Biometrics-As-A-Service (BaaS)

1500+
Enterprise Software Integrator Partners Around The World

25+
Governments Worldwide Rely On M2SYS Biometric Solutions

102
Countries Where M2SYS Solutions Are Deployed

24/7
Service Provided To Customers Across The Globe

A Comprehensive Software Solutions Portfolio

M2SYS offers a wide range of software solutions to help our customers and partners meet their specific needs. Whether you are looking to integrate a scalable biometric matching system into your existing software, rapidly implement software for various use cases, or build a tailored application for data management, biometrics, mobile, and more, we've got you covered!

eLaw Enforcement

M2SYS Software & Blockchain Platform

eGoverment Solutions Suite

This category includes our suite of on-the-fly customizable software solutions for government entities. All solutions can support biometrics and mobile devices.

Pension/Social Security

- Complete software package to manage beneficiaries and fund disbursement activities
- Includes multimodal biometric matching and de-duplication system
- Prevent fraud & establish a trusted audit trail of transactions
- Enroll and identify in the field with mobile biometric units

School Management

- A cloud-based identity management system for schools
- Biometric data capture supporting fingerprint, finger vein, palm vein, iris, and facial recognition
- Database provides detailed student information including past records
- Works with our mobile biometric devices

eForms

- Easily create web forms to capture various demographic, numeric and other data including biometrics
- Creating a centralized, uniform platform to share data across different regions, states or cities
- Blockchain back-end provides total transparency and security
- Modify or customize forms with no coding required

Employee Appraisal

- Comprehensive cloud software solution to monitor performance
- Incorporate KPIs to measure performance across various tasks
- Customizable cloud application that can be instantly tailored to your needs
- Biometric enabled appraisal system to avoid any chance of fraud
- Employee profile maintenance with advanced level analytics

eLaw Enforcement Solutions Suite

A collection of solutions designed to meet government law enforcement agency identification & data management requirements while delivering fast, secure, and reliable results.
ePolice™

- Integrated cloud and mobile app platform to address the needs of all law enforcement operational units
- Includes modules for case management, investigations, criminal booking, demographic search, and more
- Includes M2SYS CloudABIS™ multi-biometric matching system
- Mobile biometric solutions empower officers to conduct many tasks from the field

PrisonSecure™

- Modern, cloud-friendly jail and prison management system
- Includes modules for cell and bed management, prisoner tracking, incident/case management, medical histories, and more
- Utilize CloudABIS™ and M2SYS mobile biometric solutions to manage inmate and visitor identification
- Access detailed data and reports for court cases and parole

SecuredPass™

- Streamlines management of multiple border checkpoints
- Utilize CloudABIS™ multi-modal biometrics to quickly and accurately identify travelers
- Cloud-friendly with support for mobile biometric units
- Create watchlists, blacklists and alerts to instantly identify suspected travelers or known criminals

ParoleManager™

- Cloud solution to centralize parole management data and activities
- Enables parole officers to enter and store case data, documents, visit activity, incident reports, and more
- Utilize CloudABIS™ biometric system for parolee identification
- GPS solution for inmate tracking and attendance management

Credentialing Solutions

This category includes our suite of software and biometric technology solutions for systems requiring the issuance of physical credentials citizen tracking.

eID™/ National ID

- Multimodal ABIS supporting fingerprint, iris, face & finger vein
- Scalable 1:N matching and de-duplication system
- Secure AES 256-bit encryption
- Establish multi-purpose ID card for broad access coverage
- Improve national security, prevent fraud, & simplify service access

ePassport

- Complete solution package for ePassport registration & deduplication
- Scalable multimodal ABIS
- Configurable software for data management
- Integrates with SecuredPassTM border control solution
- Prevent fraud and improve national security

TrueVoter™

- Complete solution package for voter registration, deduplication & authentication
- Multimodal options including fingerprint, iris, face, and vascular
- Mobile biometric options to register voters in the field
- Prevent fraud to ensure transparency and trust in voting process

"Putting a new voter registry in place was a top priority since the old one wasn't credible. TrueVoter™ ensures that every voter is legitimate and can only vote once to give the population confidence in their newly elected government."

Grant Kippen
Chief of Party, IFES

Frictionless Software Solutions

M2SYS

Solutions for Biometric Integration & Matching

This category includes our core biometric matching system options. They are the right fit if you requiring want to add biometric matching to an existing web, Windows or mobile application.

CloudABIS™
- Scalable biometric matching system that can be deployed in private (on-premise) or public cloud environment
- Integrate in hours with our simple web API
- Remove deployment friction & ongoing support headache
- Supports fingerprint, finger vein, iris & face matching
- Affordable SaaS model for public cloud deployment

CloudScanr™
- Biometric scanner integration service
- Eliminate hassle of biometric hardware integration into Windows software and various Web browsers
- Works seamlessly with CloudABIS™
- Easily deploy any biometric device

HyperDeduplicator™
- Patent-pending fingerprint biometric de-duplication system
- Utilizes unique industrial separation process instead of traditional 1:N biometric search
- Deduplicate millions of fingerprint templates in less than 50% of the time of traditional systems
- Save money by reducing server and overhead costs

"We integrated the M2SYS fingerprint software into our core banking software to secure customer accounts and eliminate fraud. The system is deployed in over 50 branch locations to identify over 500,000 customers."

Philippe Vilgrain
SVP of Organizational Projects

UNIBANK
★★★★★
"Faisons route ensemble"

Enterprise Solutions

This category includes enterprise software solutions for different use cases that have our biometric matching system integrated into them.

RightPatient®

- Deployed in over 50 U.S. hospitals
- Prevent medical record mix-ups and fraud
- Protect population health investments
- Improve revenue cycle and patient safety
- Seamless integration with EHR systems like Epic and Cerner

VisitorTrack™

- Cloud-based biometric visitor management system
- Does not require ID cards, badges, or printers
- Supports fingerprint, finger vein, iris & face matching
- Very affordable SaaS model
- Easy to implement and use

RightPunch™

- PC-Based biometric time clock solution for Kronos & ADP
- Supports fingerprint, finger vein, iris & face matching
- Affordably prevent buddy punching & reduce compliance risk
- Includes mobile clock app using face matching
- Run biometric matching system on-premise or in the cloud

"RightPunch™ is a smart addition that will help to strengthen our labor tracking strategies and supplement our goal of helping employees boost productivity and increase accountability to achieve optimal performance."

Carmen Napa
CFO

**U.S.VISION**

Mobile Biometrics

The M2SYS mobile biometric solutions can facilitate field-level biometric enrollment and search operations with our scalable, high-performance biometric matching system. In addition, our CloudApper™ platform enables anyone to quickly and easily create customizable web and mobile apps.

Our cloud-based solutions can quickly and accurately process biometric authentication requests received from law enforcement officers in the field.

Create & customize a smartphone App within minutes (no coding/programming knowledge required) to check identities, retrieve records, upload data and pictures, and more right from a mobile device.

We offer portable, handheld mobile biometric devices that support multiple biometric modalities such as fingerprint, face, and iris capture.

Mobile Biometrics Devices

As a leading biometric technology firm, M2SYS has tested dozens of mobile biometric devices and continues to evaluate new types of biometric readers on an ongoing basis. This testing enables us to recommend the best overall choice for our customers given their unique needs. Our mobile biometric devices are portable Android computer that can be used with the M2SYS mobile app and/or suite of cloud-based biometric matching and data management software solutions.

RapidCheck™ Rugged Mobile Fingerprint Device

Android device with front-facing optical or capacitive fingerprint sensor. Great option with our mobile app platform and CloudABIS™ biometric matching system for industries like law enforcement.

MultiCheck™-C Robust Multi-Biometric Mobile Device

Multimodal biometric Android device that supports fingerprint, face, and iris capture. Beautiful design and additional options like NFC and barcode scanning make this versatile device a great option for many mobile use cases.

MultiCheck™-E Live Multi-Biometric Mobile Device

A portable biometric device for various biometric identification and registration applications. Featuring a modern design and rugged build, the device supports fingerprint (with live finger detection), iris, and face image capture.

MultiTab™ Fingerprint Biometrics Tablet

A modern, clean design and versatile capabilities makes this biometric tablet a great choice for industries like government and healthcare. Supports fingerprint and iris data capture with a NXP contactless card reader for MIFARE, CPU, NFC and e-passport reading.

Frictionless Software Solutions

M2SYS

Industry Overview

Our main goal is to develop innovative solutions that address real-world problems by understanding the unique needs of the markets we serve. We foster an environment of creativity with easy access to resources, ensuring an open environment to exchange ideas that powers the innovative identity management platforms that we develop.

M2SYS continues to innovate, build, and deliver leading-edge and flexible enterprise biometric solutions that expand the applicability of biometric technology in the government and commercial marketplace, providing easy, safe access through a unified biometric capture process.

We operate in a diverse range of industries, providing a suite of biometric identity management solutions including:

Government

Law Enforcement

Healthcare

Workforce Management

Financial Services

Government

Our eGovernment solution suite empowers government agencies and schools around the globe.

Modernize Data Collection & Management

Our solutions enable government agencies at any level to modernize their data collection and management processes. This leads to more efficient and effective services for constituents.

Accurately Govern Individual Benefits

Establish societal parity in benefit distribution, streamline access to information and eliminate identity fraud and duplicate data.

Improve Student Safety & Accountability

Accelerate operational student identity management to support secure access to educational resources, eliminate cheating and fraud, and support student parity across the institution.

Example Projects

Turkish National ID

- Type: Fingerprint, Finger Vein, Palm Vein
- Use: Citizen Identification
- Scope: > 80 million citizens, 1:N matching, hybrid scanner

Yemen Biometric Voter ID

- Type: Fingerprint & Face
- Use: Voter Identity Verification
- Scope: >15M voters w/10 fingerprints, face images & demographic info

Law Enforcement

Our eLawEnforcement solution suite empowers police departments, jails, border control authorities, and military agencies.

Increase Operational Efficiency

Establish efficient and effective law enforcement operational management to ensure a safe and secure environment for citizens.

Empower Law Enforcement Agencies

Scalable and customizable, cloud-friendly software and biometrics platform with support for mobile biometric units to improve data access and management.

Safe, Secure, & Cost-Effective Prison Management

A modern solution for Jail Authorities, Public Safety Departments, and Governments to safely and securely manage prisoner identities and records, helping to reduce errors and improve public safety.

Example Projects

US Prisoner Identification

- Type: Fingerprint
- Use: Prisoner Identity Management
- Scope: Tracking millions of prisoners across hundreds of jails

Iraqi Border Control

- Type: Fingerprint
- Use: Border Security
- Scope: Tracking over 1M registrants across 100+ terminal checkpoints

Banking/Finance

Our versatile software platform, CloudABIS™ matching system, and mobile biometric devices ensure secure banking transactions from any location.

Know Your Customers (KYC)

Customer and employee identification solution for the banking and financial service industries to help prevent fraud and protect assets.

Increase Business with Mobile Biometric Solutions

Enable your agents to see more customers and improve their experience with our mobile biometric devices and scalable software platform.

Establish a Concrete Audit Trail

Create a reliable, immutable record history of all customer and employee transactions by incorporating blockchain and biometrics.

Example Projects

BANK OF AFRICA
Groupe BMCE BANK

Bank Customer ID

- Type: Fingerprint
- Use: Integrated with core banking software to secure customer identities across banking branch locations
- Scope: 180 scanners, 200k+ enrollments

GRUPO MONGE

Micro Credit Customer ID

- Type: Fingerprint
- Use: Micro Credit Customer Identification in South and Central America to reduce fraud.
- Scope: Half a million enrollments

Workforce Management

Our suite of workforce solutions can transform employee productivity and the bottom line for any organization.

Build an Efficient and Productive Workforce

Create apps to instantly retrieve accurate employee data, manage training and onboarding processes, and identify opportunities to optimize resources.

Improve Profitability and Compliance

Reduce payroll expenses, increase employee accountability, and eliminate time theft with our RightPunch™ biometric time clock software for Kronos.

Reduce Fraud, ID Theft & Unauthorized Access

Complete employee profiling solution with demographic and biometric data to reduce fraud, prevent "ghost" employees, and improve security by preventing unauthorized entry or access within the workplace.

Example Projects

Campbell's
Kronos Time Capture
- Type: Finger Vein
- Use: Integrated with Kronos Employee Self-Service (ESS) portal for secure login
- Scope: 50+ facilities

allphones
Pont-Of-Sale Access
- Type: Fingerprint
- Use: Secure POS Login
- Scope: 500+ devices; 3,000 employees

M2SYS

RightPatient® transforms the legacy approach to healthcare visits by creating a personalized patient experience while lowering costs and improving safety.

Drive Duplicate Medical Record Rates to 0%

Prevent medical record mix-ups during registration through accurate patient identification.

See More Patients

Our AI nurse frees time for doctors by automatically collecting important clinical information from patients.

Boost the Bottom Line

RightPatient® eliminates write-offs associated with patient identity fraud and readmissions.
