

eGov by M2SYS
Parole Management System

eGov Parole Management Solution enables parole officers identify parolees, manage case files, parole terms and length, and visit management.

eGov Parole Management Solution enables parole officers identify parolees, manage case files, parole terms and length, and visit management.

The M2SYS Parole Management Solution assists parole officers by allowing them to easily identify parolees and manage case files, parole conditions and length, visit management, and parole violation tracking. The system also includes a GPS tracking solution for location monitoring and attendance verification.

The M2SYS Parole Administration Solution is built to securely maintain, identify and track parole activities with automated repetitive procedures, that offers an integrated approach to parole management. This allows agencies and parole officers to reduce manual workloads. It automates routine operations like verifying the status and whereabouts of parolees, arranging visits, incident recording and checking parole violation instances, allowing parole officials to properly plan, monitor, and manage each case while keeping digital logs for them.

Key Benefits

Adaptable Solution

The parole system is designed to suit the needs of different law enforcement agencies to facilitate usability and adaptability with any third party applications.

Data Accessibility

The parole offices now can access data from anywhere and everywhere even from their mobile devices. Thanks to on demand data availability the users can make instant decision.

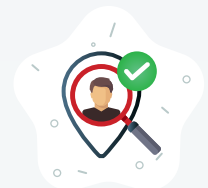

Centralized Database

The solution digitizes the manual paper based processes by implementing a centralized database. This allows parole officers to reduced data redundancy & gather valuable insights.

Workload Distribution

The Parole Management System is a complete solution that offers easy management of different parole activities. This results in reduced workloads of parole officers who juggles between multiple cases.

Easy Monitoring

It is critical to keep a proper tap on the parolees. M2SYS parole management system offers all vital metrics under one roof that make the monitoring super easy so the offenders don't get out of hand.

How Parole Management System works

Parole is one of the most important parts of a country's overall judicial system. Once an inmate is released on parole, all the relevant information, along with biometric data, is enrolled into the system. Then a parole office schedules regular visits from an easy-to-use scheduler module. During visits, the parolees need to authenticate themselves using a biometric matching system. If everything checks out, a parole officer updates case logs accordingly. The parole officer also has the option to apply corrective measures when an offender violates any parole regulations or misses a visit. All the violation logs are kept on the system, and the parole officer can easily track the parolee's whereabouts using a GPS tracking system.

Features of Parole Management System

Digital Parole Management

Access all parolee data from a mobile device or web browser using a single unified solution.

Parole Records

Soldier rationing management ensures tracking of the rations that are provided to the soldier.

Holistic Profiling

Create parolee profiles for better analytics and reporting to instantaneously access data.

Multi-modal Biometrics

multimodal biometric matching system for parolee authentication to improve security.

Customizable Modules

Our customizable module structure allows you to fit your agency's procedures without limits.

Analytics & Reporting

Make data-driven decisions using our advanced analytics and reporting module.

eGov Solutions

The M2SYS eGov platform offers a variety of customizable e-government solutions that can be seamlessly integrated by system integrators, biometric device manufacturers, and ABIS providers. Some popular solutions are:

Why you should choose M2SYS

M2SYS is a globally recognized digital transformation and citizen identification technology firm. Our eGov platform innovation enables us and our partners to rapidly deliver customized web and mobile apps at a very affordable price point.
